

[Cell Lines](#) [SCA3](#) [Publication](#)

11

IDENTIFICATION

Causal gene(s)	ATXN3
Repeat size or mutation	64 CAG
Cell type	Fibroblast

DONOR INFORMATION

Donor gender	Female
Age at disease onset (years)	42
Age at collection (years)	54

SOURCE & PUBLICATIONS

Originating lab / institution	University Medical Center Groningen (UMCG)
Links to publications or public resources	Levels of DNAJB family members (HSP40) correlate with disease onset in patients with spinocerebellar ataxia type 3 - PubMed https://pubmed.ncbi.nlm.nih.gov/20726892/
