

[Cell Lines](#) [MSA/OPCA](#) [Publication](#)

## MSA-P3 (probable MSA-P)

### IDENTIFICATION

Causal gene(s)	?
Cell type	hiPSC

### DONOR INFORMATION

Donor gender	Female
Age at collection (years)	56

### SOURCE & PUBLICATIONS

Originating lab / institution	Hannover Medical School
Links to publications or public resources	<p>iPSC-Derived Striatal Medium Spiny Neurons from Patients with Multiple System Atrophy Show Hypoexcitability and Elevated u03b1-Synuclein Release - PubMed <a href="https://pubmed.ncbi.nlm.nih.gov/36672158/">https://pubmed.ncbi.nlm.nih.gov/36672158/</a></p> <p>Proteomics of Patient-Derived Striatal Medium Spiny Neurons in Multiple System Atrophy - PubMed <a href="https://pubmed.ncbi.nlm.nih.gov/40940805/">https://pubmed.ncbi.nlm.nih.gov/40940805/</a></p>
