Cell Lines SACS/ARSACS/SPAX6 Publication

# SK.01AiPS

## IDENTIFICATION

| | |
|---|---|
| **Causal gene(s)** | SACS |
| **Repeat size or mutation** | c.9284dupC (homozygous) |
| **Cell type** | hiPSC |

## DONOR INFORMATION

| | |
|---|---|
| **Donor gender** | Female |
| **Age at collection (years)** | 35 |

## SOURCE & PUBLICATIONS

| | |
|---|---|
| **Originating lab / institution** | Obtained from: McGill University |
| **Links to publications or public resources** | In Vitro Characterization of Motor Neurons and Purkinje Cells Differentiated from Induced Pluripotent Stem Cells Generated from Patients with Autosomal Recessive Spastic Ataxia of Charlevoix-Saguenay - PubMed<br>https://pubmed.ncbi.nlm.nih.gov/37096129/ |
